

## Real Time Ware, Inc. Introduces **FERROMAGNETIC TAGGING FMT3000**

### Description

Provides real-time, in-line monitoring of the mix-ratio of two-component adhesives and foams. FMT3000 measures actual mix ratio as material is dispensed onto a part.

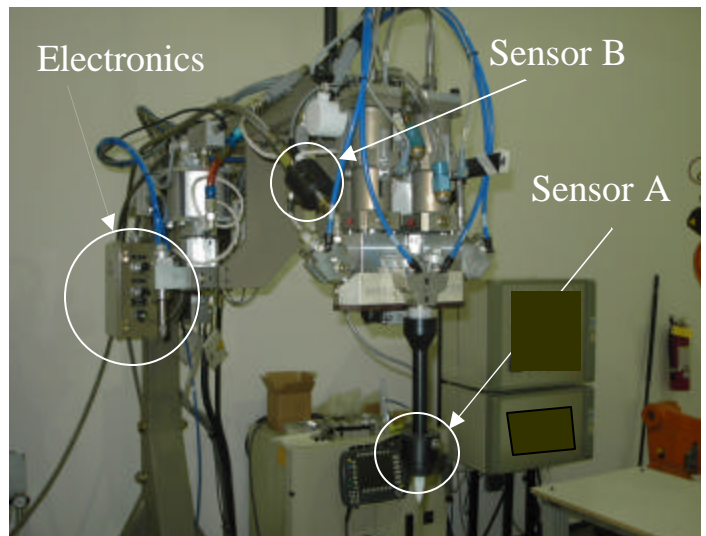

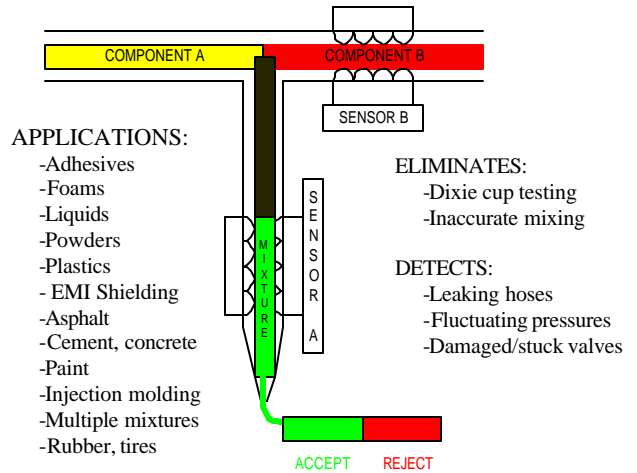

### Benefits

Through continuous, real-time monitoring of the adhesive mix ratio, FMT3000 eliminates off ratio parts ensuring long term durability.

### Additional Applications

Any mixing process will benefit from FMT3000. Asphalt, cement, paint are only a few of the possibilities. Various tagging materials are available. Call us with your needs!

PROCESS AND EQUIPMENT PATENTED WITH SEVERAL PATENTS PENDING

THE HENRY FORD  
TECHNOLOGY AWARD

### Installations:

F150 Closures – Dearborn Stamping

Ford 500, Freestar Closures – Chicago Hts.

Mustang Hood – Woodhaven Stamping
